

AppCompatActivity

```
classDiagram
    class AppCompatActivity
    class FirstRunActivity["org.buildmlearn.toolkit.activity.FirstRunActivity"]
    FirstRunActivity --|> AppCompatActivity
```

The diagram illustrates a class hierarchy. At the top is the 'AppCompatActivity' class, represented by a white box with a thin purple border and two empty internal compartments. Below it is the 'org.buildmlearn.toolkit.activity.FirstRunActivity' class, represented by a grey box with a thick black border and two internal compartments. A blue arrow with an open triangular head points from the 'FirstRunActivity' class up to the 'AppCompatActivity' class, indicating that 'FirstRunActivity' inherits from 'AppCompatActivity'.

org.buildmlearn.toolkit.activity.
