

BaseAdapter

```
classDiagram
    class BaseAdapter {
    }
    class LearnSpellingAdapter {
        + LearnSpellingAdapter()
        + getCount()
        + getItem()
        + getItemId()
        + getView()
    }
    BaseAdapter <|-- LearnSpellingAdapter
```

The diagram shows a class hierarchy. At the top is the 'BaseAdapter' class, represented by a rectangle with three horizontal compartments. Below it is the 'LearnSpellingAdapter' class, represented by a rectangle with three horizontal compartments. The top compartment of 'LearnSpellingAdapter' contains the package and class name. The middle compartment is empty. The bottom compartment contains a list of methods, each preceded by a '+' sign. A blue arrow with an open triangular head points from the top of 'LearnSpellingAdapter' to the bottom of 'BaseAdapter', indicating that 'LearnSpellingAdapter' inherits from 'BaseAdapter'.
